Corey Pittman - Founder & CEO, Milenial Inc.

Auburn, GA | corey@milenialinc.com | www.milenialinc.com | GitHub: Corey6320

Executive Summary

Corey Pittman is the founder and CEO of Milenial Inc., a dual-platform Software-as-a-Service (SaaS) and Compliance-as-a-Service (CaaS) startup focused on breaking federal procurement barriers for underrepresented businesses. With over 30 years of lived experience in logistics, compliance-driven environments, and entrepreneurship, Corey launched Milenial Inc. to automate, simplify, and expose the often-inaccessible systems that block smaller entities-especially Black-owned and minority-led ventures-from competing for government contracts.

He is both the developer and the test subject. Every feature of the Milenial platform is first validated through his own business journey, making the solution grounded in reality, not theory.

Mission

Corey's mission is to ensure that overlooked businesses no longer fail to qualify due to paperwork, language barriers, or lack of insider knowledge. His platform turns lived compliance hurdles into digital workflows and logic models that allow first-time vendors to onboard with confidence, clarity, and dignity.

Technical Capabilities

- Web Stack: Next.js, Tailwind CSS, JavaScript

- Database & Auth: Supabase (PostgreSQL, Auth, API integration)

- Cloud Deployment: Vercel

- Version Control & Documentation: GitHub (3 repo system: platform, simulations, docs)

- Document Infrastructure: PDF/A formatting, business plan alignment, SBIR-ready documentation

- Dev Environments: Visual Studio Code, Supabase SQL CLI, GitHub workflows

Platform Development Highlights

- Created Milenial Inc. as both a research subject and delivery platform

- Built secure login, onboarding, and document logic workflows using Supabase + Next.js

- Established GitHub-hosted architecture with real-time documentation, data demos, and process simulations

- Drafted and maintained a grant-ready SBIR Phase I business plan with supporting exhibits

- Structured Milenial to remain independent, Black-owned, and self-sustaining without investor dependency

- Developed a compliance simulation engine to support onboarding use cases including EIN verification, IRS identity conflicts, and SAM.gov logic gaps

Founder Statement

"Every barrier I break in my business becomes a feature in the platform."

- Corey Pittman
